

Barn Owl Box

BOB

Ready to accept optional camera system with 30mtr lead

- Robust long-lasting design
- Integral lockable inspection/cleaning hatch
- Made predominantly from naturally durable FSC hardwood timber

The Barn Owl Box is constructed from a combination of plywood and naturally durable timber such as Cedar (FSC certified timber from well managed forests). Robust in construction the box is designed to last for many years. The unit comes complete with a lockable inspection/cleaning hatch and a sizeable shelf/exercise area which is hinged and demountable for ease of transport

Barn Owl facts

Barn owls will readily use constructed timber nest boxes so long as they are located close to open feeding areas. They hunt from the air and feed mainly upon small mammals, particularly voles.

On their wings specially adapted 'soft' feathers with tiny hairs help deaden the sound of their wings and allow them to fly almost silently.

Barn owls don't Hoot! They make a screeching or hissing sound.

Barn owls are specially protected by law.
